POCUS Proficiency At Your Fingertips

The Global Ultrasound Institute (GUSI) provides evidence-based point of care ultrasound education for clinicians of all skill levels.

With several program options and more than 80 POCUS exam types, GUSI Fellowships provide practical, hands-on scanning experience designed for everyday clinical practice and any specialty.

Our comprehensive structured learning curriculum integrates POCUS theory with practical, hands-on scanning experience.

Training To Teach

This virtual learning experience is unique in that it is created specifically for POCUS champions, teachers, mentors, and Residency Program faculty—anyone working to build confidence and competence with POCUS in everyday clinical practice.

We match you with a GUSI Mentor best suited for your schedule and clinical specialty. Our Mentors are Family Medicine physicians and Resident Program faculty passionate about sharing POCUS knowledge and experience.

Each Fellowship Program Includes

- GUSI Family Medicine Faculty POCUS Expert — Assigned Mentor
- POCUS Essentials online course — 12-month subscription
- Selection of more than 80 POCUS Exam types to pursue credentialing
- 25 precepted Scan Reviews per Exam Type
- 1 Hour Virtual Mentorship Sessions with tele-ultrasound scanning, scan critique, clinical integration discussion, and pathology review
- Lifetime access to GUSI scanFolio™ online and Performance Dashboard Access to monthly Rapid Fire
- Access to Rapid Fire scanReview™ sessions, GUSI newsletters, and webinars

HOW scanOne™ WORKS

These POCUS Fellowships are self-guided, individualized, virtual learning experiences

Using real-time tele-ultrasound technology, your mentor can coach you as you scan, providing feedback on technique and image optimization. Your monthly mentorship session also includes rapid image interpretation, pearls and pitfalls, and clinical integration discussions.

Plus, each month GUSI hosts an optional, online Rapid Image Review forum online.

NEW in 2024: access your Fellowship features and much more through the scanOne™ mobile app—coming soon for IOS in the App Store.
